

CIS67 APA Citation Style Resources

The links shown here do change quite frequently, however, the first three I checked and provided some content for you review. You will find what you are looking for in one of these links. If you are so motivated to check the rest of them, please feel free to do so.

The Modern Language Association (MLA) Style is widely used for identifying research sources. In MLA style you briefly credit sources with parenthetical citations in the text of your paper, and give the complete description of each source in your *Works Cited* list. The *Works Cited* list, or *Bibliography*, is a list of all the sources used in your paper, arranged alphabetically by author's last name, or when there is no author, by the first word of the title (except *A*, *An* or *The*). [5.1-5.5]

The examples of APA styles and formats listed on this page include many of the most common types of sources used in academic research. For additional examples and more detailed information about APA citation style, refer to the Publication Manual of the American Psychological Association and the APA Style Guide to Electronic References.
